## Minnesota Statewide Testing Program (MSTP)

Hello,

My name is Linda Rogers, and I am the Manager of the Minnesota Statewide Testing Program (MSTP) at the University of Minnesota. We are the state's primary provider of nationally normed achievement tests for homeschool students. Homeschool students are required to take such a test annually, and must present a record of completion upon entry back into the school district.

There are more than 20,000 students homeschooled in Minnesota each year, and available data indicates that only a small fraction of these students are completing the requirement. Please help us support homeschools by linking our resources to your website or sharing with anyone who registers a homeschool in your district.

[Click here](#) to download a flyer with some basic information about the homeschool testing offerings through the Minnesota Statewide Testing Program.

If there is anything we can do to better support you, please feel free to email me directly at [roger009@umn.edu](mailto:roger009@umn.edu) or contact us at [mstp@umn.edu](mailto:mstp@umn.edu) at any time.
